GoToCoin

What could even be better?
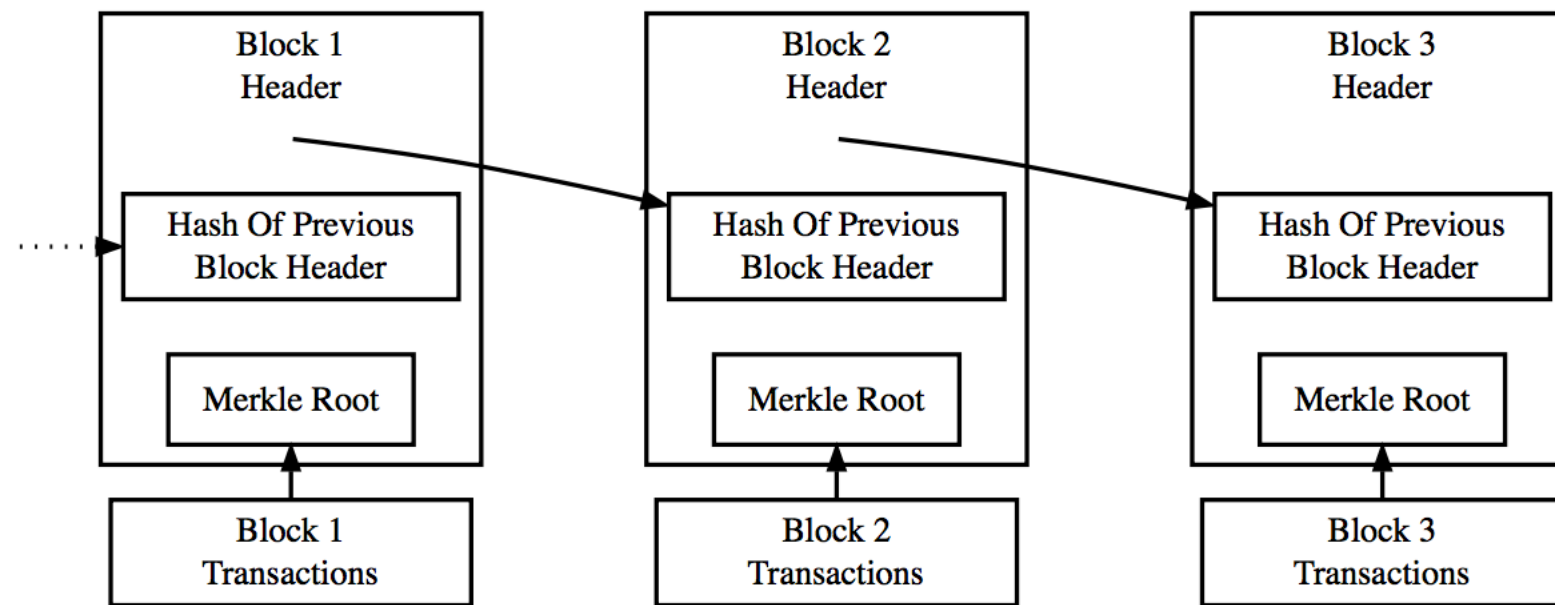

GoToCryptoCoin

A solution for managing and retaining pledges

Main tasks

- Simplify issuing of the scholarships to GoTo students

- Introduce new level of reliability of newbies to GoTo

- Provide a multifunctional experimental platform for teachers and curators
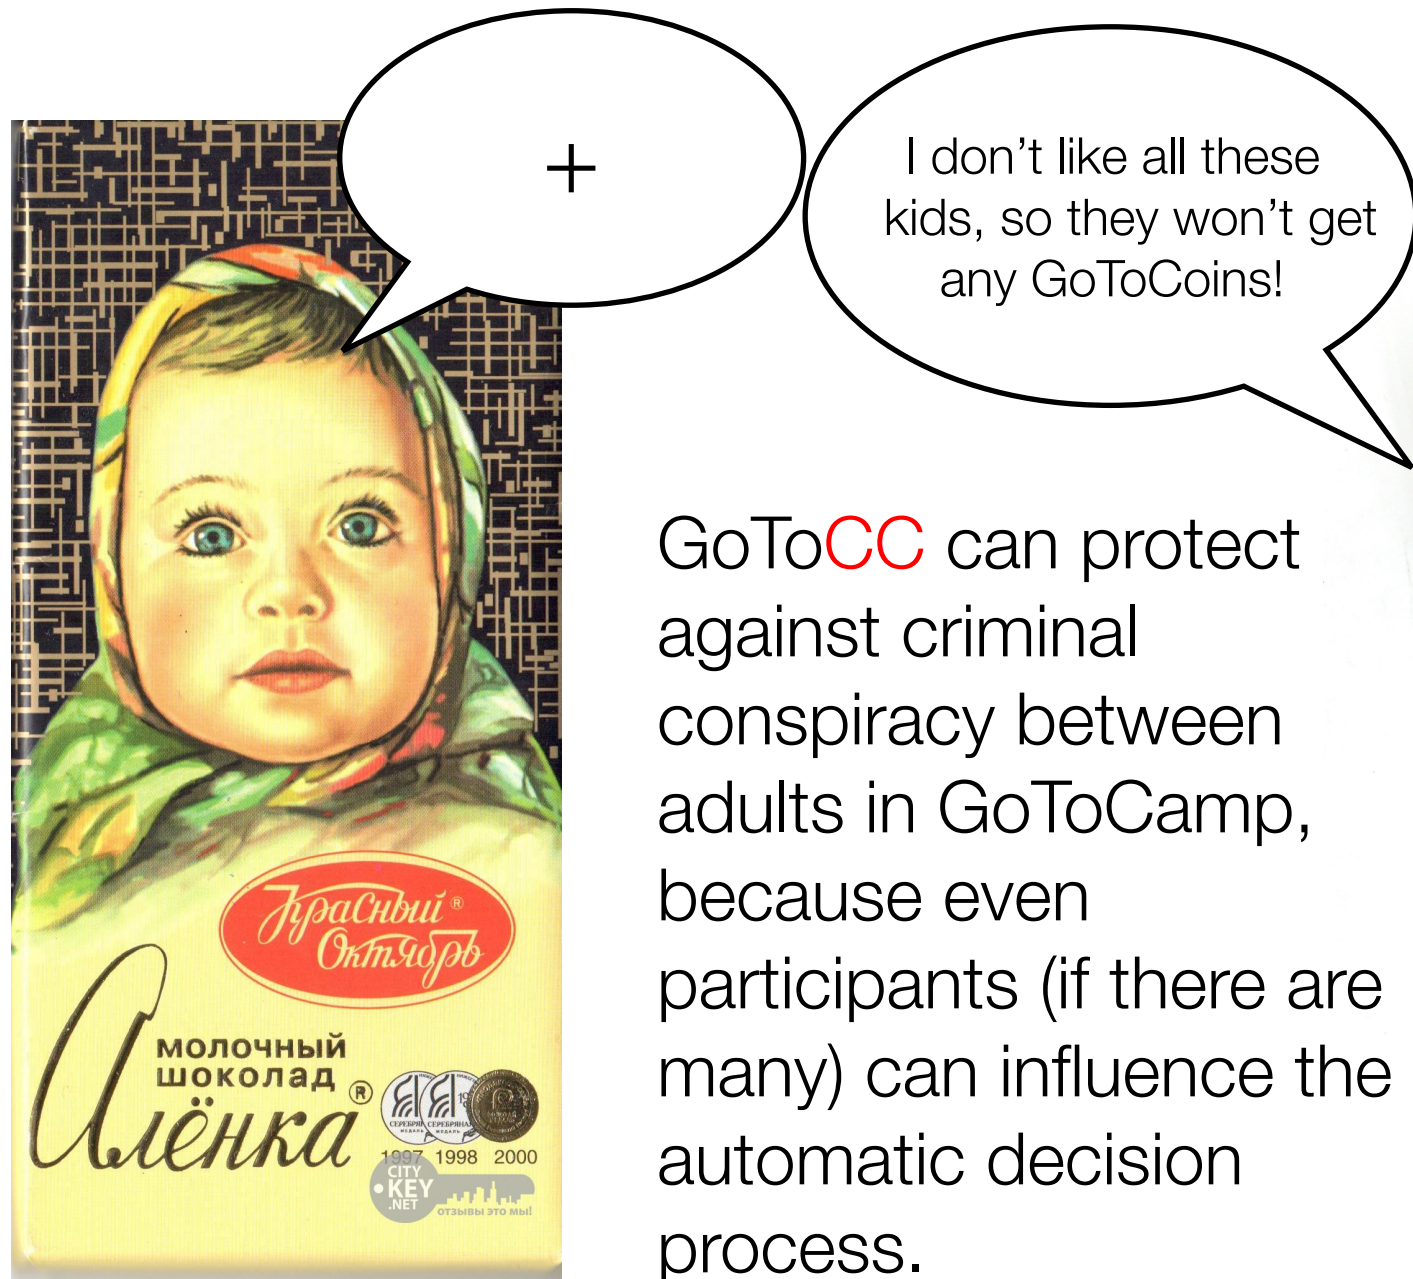

- Make a blockchain! Hooray!

Blockchain

Simplified Bitcoin Block Chain

Why add that extra 'C'?

First scenario

+

I don't like all these kids, so they won't get any GoToCoins!

GoToCC can protect against criminal conspiracy between adults in GoToCamp, because even participants (if there are many) can influence the automatic decision process.

Second scenario

What if somebody doesn't believe that GoTo will actually give you a scholarship?

GoToCC will ensure that scholarships can be awarded only based on your merit. Plus, you can always decide to spend your GoToCC to milk the cows.

Future plans

- More smart contracts = more interesting mechanics in GoTo
- Rewrite on Haskell from ground up
- Security++

The most charming and powerful UI from our world-known Web designer
